twenty years ago the objectives of the first edition of this book were numerous and ambitious to demystify the process of well log analysis to examine the physical basis of the multitude of geophysical measurements known collectively as well logging to clearly lay out the assumptions and approximations routinely used to extract petrophysical information from these geophysical measurements to expose the vast range of well logging instrumentation and techniques to the larger geophysical community finally there was the important goal of providing a textbook for university and graduate students in geophysics and petroleum engineering where none suitable had been available before what's different twenty years later first of all well logging for earth scientists is long out of print the petroleum industry the major consumer of the geophysical information known as well logging has changed enormously technical staffs have been slashed and hydrocarbons have become increasingly harder to locate quantify and produce in addition new techniques of drilling high deviation or horizontal wells have

engendered a whole new family of measurement devices incorporated into the drilling string that may be used routinely or in situations where access by traditional wireline instruments is difficult or impossible petroleum deposits are becoming scarce and demand is steadily increasing massive corporate restructuring and the graying of the workforce have caused the technical competence involved in the search and exploitation of petroleum to become scarce although we are only attempting to address this latter scarcity with our textbook the objectives are still ambitious

what is the fastest that humans have ever travelled do all scientists agree that they understand gravity is the argument of darwin versus creationism a good argument on either side could some reality be in fact be an illusion as einstein implied this book tries to answer some of those questions and how all truth we perhaps might believe might actually exist together at the same time the first two sections of this book speak to science and human knowledge and how much do we humans really know i have a science degree but even i learned much in research while writing this book i tried to begin this book with a completely open mind since i believe that is how to seek truth in some cases i found new things surprising at least to me in other cases i just learned what some bright people in the past and current also think which just made me smile and i tried to write the book in such a simple manner that even i can understand it after the first two sections i do get into some theories of mine based on human knowledge and science in the beginning of the book you are more than welcome to form other theories those ensuing discussions might even make life more interesting is the purpose of this book to convince you of something no it's goal is to make us all think including me and also to get our discussions into the 21st century for some odd reason some humans believe that other humans should never think about things that are important science has moved on we no longer believe that the world has only four elements earth wind and fire and water it is time to get up to speed with what humans have learned and then comes the fun of deciding what theories based on that each of us wish to believe

this glossary has been prepared in order to leave a record of the quechua spoken by the people of huarás and surrounding areas in the mid 20th century huarás capital of the region department of ancash peru has a distinct form of quechua that dialect was endangered due to a massive earthquake on may 31 1970 tens of thousands of people died and the city was destroyed many of the survivors left the area once rebuilt huarás was repopulated with people new to the area who use spanish or a different dialect to communicate since then technological influences such as the internet also reinforce the use of spanish to the detriment of the local quechua born in huarás i was raised in a bilingual environment spanish and quechua although i left the area to attend the university i could always feel at home upon returning until that

earthquake since then it seems strange to return to an unfamiliar city due to people language and environment i hope this glossary will help the newer generations better understand not only their grandparents and ancestors but the culture from which they come language and culture are intimately tied and much more than words is lost when a language dies the inca empire tawantinsuyo was invaded by spain in 1532 at that time quechua was spoken never written throughout the inca civilization with many dialects since then the spanish language has been imposed but in huarás never did it replace quechua to the extent that it did in 1970 this glossary contains words several verb forms and phrases it is written with the expectation that it may help to preserve the inherited quechua so that huarás may remain bilingual it is written for huarasinos the people of huarás if others find it useful better yet the glossary is in quechua to facilitate access to the quechua indices in spanish and in english are included m mosquera

Decidir en Español: A Comprehensive Guide to Making Decisions in Spanish

Making decisions is a fundamental part of daily life, and expressing these decisions clearly and accurately is crucial, especially when communicating in a different language. This article will explore the multifaceted ways to express "decide" in Spanish, delving into the nuances of different verbs, contexts, and their appropriate usage. Understanding these nuances will enhance your fluency and enable you to communicate more effectively in Spanish-speaking environments.

I. The Core Verb: Decidir Q: What is the most direct translation of "to decide" in Spanish? A: The most straightforward translation of "to decide" is the verb *decidir*. It's a regular -ir verb, meaning its conjugation follows standard patterns. Yo decido: I decide Tú decides: You (singular, informal) decide Él/Ella/Usted decide: He/She/You (singular, formal) decides Nosotros decidimos: We decide Vosotros decidís: You (plural, informal, used in Spain) decide Ellos/Ellas/Ustedes deciden: They/You (plural, formal) decide Example: Decidí ir al cine. (I decided to go to the cinema.)

II. Nuances and Alternatives to Decidir Q: Are there other ways to express the idea of "deciding" in Spanish besides *decidir*? A: Yes, depending on the context and the nuance you wish to convey, several alternatives exist. These often reflect different aspects of the decision-making process.

Resolver: This verb implies solving a problem or reaching a conclusion, often after deliberation. It suggests a more complex decision involving overcoming obstacles. Resolví el problema de la fuga de agua. (I solved the problem of the water leak.) Here, "solving" the leak implies a decision on how to fix it.

Optar: This verb focuses on choosing one option from several alternatives. Opté por el plato de pescado. (I opted for the fish dish.)

Escogerr/Elegir: These are synonyms meaning "to choose" or "to select," often implying a preference among multiple options. Escogí este vestido para la fiesta. (I chose this dress for the party.) Elegí la universidad más cercana a mi casa. (I chose the university closest to my house.)

Determinarse: This implies making a firm decision, often after some hesitation. It emphasizes the finality and resolve of the decision. Finalmente se determinó a viajar solo. (Finally, he decided to travel alone.)

Tomar una decisión: This is a phrase meaning "to make a decision," a more literal translation of the English expression. Necesitamos tomar una decisión pronto. (We need to make a decision soon.)

III. Expressing the Outcome of a Decision Q: How do I express what someone has decided in Spanish? A: Beyond the act of deciding, you

might need to express the outcome of that decision. This can be done using various constructions: He decidido que...: (I have decided that...) – This introduces the result of the decision. He decidido que iré a la playa mañana. (I have decided that I will go to the beach tomorrow.) Mi decisión es...: (My decision is...) – This presents the decision as a statement of fact. Mi decisión es quedarme en casa. (My decision is to stay home.) Se ha decidido que...: (It has been decided that...) – This is used for decisions made by a group or authority. Se ha decidido que la reunión se pospondrá. (It has been decided that the meeting will be postponed.) IV. Context and Informal Expressions Q: How does the context influence the choice of words when talking about decisions? A: The best word to use depends heavily on context. Informal settings might use simpler verbs or phrases. For example, you might hear: Me voy a...: (I'm going to...) – Often used for quick, uncomplicated decisions. Me voy a comer una hamburguesa. (I'm going to eat a hamburger.) Voy a...: (I'm going to...) - similar to the above Hago...: (I do...) – used when the decision is an action. Hago las maletas. (I'm packing my bags.) V. Conclusion

Understanding the nuances of expressing "decide" in Spanish goes beyond simply knowing the verb decidir. The richness of the language offers a variety of verbs and phrases that allow for a more precise and nuanced communication of your decisions, reflecting the specific context and the nature of the choice involved. By paying attention to these nuances, you can significantly improve the clarity and effectiveness of your Spanish communication. FAQs: 1. Q: How do I express indecision in Spanish? A: You can use phrases like "No me decido" (I can't decide), "Estoy indeciso/a" (I'm undecided), or "No sé qué hacer" (I don't know what to do). 2. Q: How do you say "I've made up my mind" in Spanish? A: You can say "Ya me he decidido" (I've already decided), "Ya lo he decidido" (I've already decided it) or "Ya tomé una decisión" (I already made a decision). 3. Q: What's the difference between decidir and determinar? A: While both involve making a decision, determinar implies a stronger, more resolute decision, often after a period of uncertainty or deliberation. 4. Q: How can I express a difficult decision in Spanish? A: You could use phrases like "Fue una decisión difícil" (It was a difficult decision), "Me costó mucho decidir" (It was hard for me to decide), or "Tomar esta decisión fue un verdadero desafío" (Making this decision was a real challenge). 5. Q: How do I express a spontaneous decision in Spanish? A: You could use phrases like "Lo decidí en el momento" (I decided at the moment), "De repente decidí..." (Suddenly I decided...), or employ verbs that suggest spontaneity like improvisar (to improvise) or actuar (to act).
